

## Polymaker PC-Plus™

Polymaker PC-Plus™ is a polycarbonate based filament designed specifically for desktop FDM/FFF 3D printing. It offers superior printing quality, excellent mechanical strength and heat resistance and great warping resistance

### Lets Talk Engineering

Polycarbonate (PC) is one of the most widely used engineering plastics in the world. Cars, cell phones, computers, electronics, eye-glasses - we interact with PC almost everyday.

### Optical Clarity

Polymaker PC-Plus™ shows good optical clarity, rendering parts with an attractive crystal shine!

### Heat Resistance

Polymaker PC-Plus™ offers better heat resistance than almost all other 3D printing materials currently in the market. It can withstand temperatures well above 110 °C.
